SUMMARY

Flutter Developer with 4+ years building cross-platform, enterprise applications. Currently delivering sustainability and infrastructure monitoring solutions at the Digital Innovation Center. Strengths in IoT integrations, clean architecture, and secure user platforms. Skilled in Flutter, BLoC, Firebase, and RESTful APIs with a focus on scalable, maintainable code.

EDUCATION

Benha University – Shoubra Faculty of Engineering

Sep. 2020 – Jun. 2025

B.Eng. in Computer and Communications

Shoubra, Cairo

- CGPA: 3.01
- Graduation project: Integrated **Flutter** with **ESP32** for mobile-IoT communication; received an **Excellent** rating.

Mobile Apps Development – DEPI

May 2024 – Oct. 2024

Trainee

Nasr City, Cairo

- Focused on **Kotlin**, **Java**, and **Flutter** to develop high-performance Android and cross-platform apps.
- Implemented state management using **BLoC** for robust UI/UX and seamless data flow.

Full Stack Web Development using .NET – ITI

May 2022 – Aug. 2022

Trainee

Benha

- Built back-end services in **C#** and **.NET Core**, with front-end in **Angular**.

TECHNICAL SKILLS

Programming: Dart, Java, Kotlin, Python, C#, JavaScript

Frontend: HTML5, CSS3, JavaScript, Angular

Mobile: Flutter, Android (Kotlin/Java)

Backend: REST APIs, Firebase, SQL, NoSQL

State: BLoC, Provider, GetX, Redux

Tools: Git, GitHub, Android Studio, VS Code

Architecture: MVVM, Clean Architecture, SOLID

Methods: Agile, Scrum, Kanban

EXPERIENCE

The Art Click - KSA

Sep. 2025 – Present

Senior Flutter Developer

Full time — On-site — Mohandessin, Cairo

- Own end-to-end delivery of customer- and merchant-facing Flutter apps, from technical discovery and architecture to release and observability.
- Designed a modular **Clean Architecture** with feature-based packages and **BLoC/Cubit** state management to keep code scalable and testable.
- Integrated payments (SDK/REST) and secure auth (JWT with refresh/rotation), plus role-based feature flags using remote config.

Digital Innovation Centre (DIC)

Nov. 2024 – Sep. 2025

Senior Flutter Developer

Full time — Remote — UK/CZ

- Led development of enterprise Flutter apps for sustainability and digitalization solutions.
- Architected cross-platform systems integrating IoT sensors, data analytics, and cloud infrastructure.
- Collaborated with international research teams to deliver production-ready applications.

Extend IT Solutions

Jul. 2024 – Jan. 2025

Flutter Developer

Full time — Remote — Aleppo, Syria

- Built cross-platform restaurant management apps with **Flutter**, **Dio**, and **BLoC**.
- Implemented secure REST APIs with auth and real-time sync across mobile platforms.
- Optimized performance (render times ↓ 40%) via efficient state management patterns.

Ministry of Communications and Information Technology (MCIT)

Dec. 2023 – Oct. 2024

Programming Instructor, Digital Egypt Cubs Initiative

Part time — On-site — Nasr City, Cairo

- Instructed 100+ participants in programming fundamentals, algorithms, and data structures.

- Developed curriculum covering OOP, mobile fundamentals, and problem-solving.
- Mentored student apps; 85% project completion with positive feedback.

Smart Code – System and Administrative Solutions

May 2022 – Aug. 2023

Software Engineer

Shoubra, Cairo

- Improved enterprise apps using **.NET, C#, SQL**; reduced system latency by 35%.
- Introduced automated testing; code coverage ↑40% and bug reports ↓25%.
- Delivered feature enhancements that raised user satisfaction by 30%.

Xiaomi Egypt

May 2019 – Apr. 2022

Manual QA Tester — MIUI/HyperOS Updates

Downtown, Cairo

- Executed manual QA for pre-release MIUI/HyperOS OTA builds across multiple devices/regions; validated download integrity, signature/OTA checks, install/reboot cycles, rollback, and core functionality (connectivity, sensors, system apps).
- Captured and triaged defects using **adb logcat**/bugreports; coordinated with firmware/app teams to verify hotfixes and approve staged rollouts, reducing post-release issues.

PROJECTS

POS Management System — Mini ERP | Flutter (BLoC), Laravel 10 (PHP 8.1), MySQL, REST, RTL

Mar. 2025

- Built two cohesive layers: **Flutter** mobile (BLoC, Arabic/RTL support) and **Laravel 10/MySQL** backend with clean Services/Policies structure.
- Fast POS with sales invoices/returns, promotions & discounts, and multi-payment methods (cash, card, bank transfer).

PulseHub — Enterprise User Management | Flutter, Firebase, BLoC, REST

Feb. 2025

- Centralized authentication with RBAC and MFA supporting 2,000+ concurrent users.
- Designed for seamless integration with CloudMate, ProjectsHub, and PulseFin.

CloudMate — Construction Monitoring | Flutter, IoT, BLoC, Real-time

Jan. 2025

- Interfaces with 500+ IoT sensors; real-time dashboards for structural health.
- Analytics for anomaly detection and early-warning insights.

PulseFin — Financial Management | Flutter, Secure API, BLoC, Encryption

Oct. 2024

- End-to-end encrypted workflows compliant with financial requirements.
- Advanced reporting with customizable visuals and export.
- Automated forecasting using historical data.

ProjectsHub — Project Management | Flutter, Firestore, Provider, REST

Sep. 2024

- Organizations, users, providers, and resource allocation in one platform.
- Template-driven workflows and automated milestone tracking.
- Real-time collaboration for stakeholders and dev teams.

Restaurant Management System | Flutter, REST, Dio, BLoC, Firebase

Aug. 2024

- Customer, delivery, and admin apps using **Clean Architecture + BLoC**.
- Real-time notifications, payments, analytics; 99.5% uptime.

Poems and Poetry | Flutter, AdMob, BLoC, Firebase, Analytics

May 2024

- 150,000+ downloads; recommendations via analytics-driven signals.
- Auth + Firestore; monetized with Google AdMob.

Sleep Tracker Pro (OSS) | Flutter, BLoC, MVVM, Firebase, ML

Dec. 2023

- 5,000+ active users; custom analytics pipeline.
- Personalized ML-based sleep recommendations; GDPR-aligned data handling.

AOSP Contributions — Xiaomi Mi 10T | Android, Java/Kotlin, Bash, Python, Linux

Sep. 2022

- Resolved 15+ critical bugs; kernel optimizations improved battery life by 20%.
- Worked with international contributors using Git and CI/CD.

VOLUNTARY WORK

Resala Charity Organization

Jan. 2024

Flutter Development Instructor

Dokki Branch, Cairo

- Weekly advanced Flutter workshops for 30+ participants (state management, architecture, REST).
- Authored curriculum and hands-on exercises for real-world app builds.
- Mentored 15+ learners; 10 apps published.
